

FOR THE BUILDER AND DESIGNER

- Free technical advice for concept design work
- No obligation budgets and quotations
- Easy to design with
- Full support with standard design details

ON SITE

- Bracing systems available for hire
- ECO-Blocks are light, fast and easy to use
- You get experienced technical support on site
- Versatile product for construction

Our friendly team are ready to help you on your next project

INSULATED CONCRETE FORMWORK

REDEFINING THE WAY KIWIS BUILD
SIMPLER. FASTER. BETTER.

ECO ICF BLOCK SYSTEMS

- Inter tenancy walls
- Foundation walls
- Basement walls
- Curved walls
- Fences & retaining walls
- Insulated concrete tilt slabs
- Insulated swimming pools

ECO ICF MID FLOOR SYSTEMS

- High R value for energy efficiency
- No cracking or creaking of the floor
- Great acoustic performance
- Sustainable construction
- Can be used on any suitable wall system

Excellent reasons to choose ECO ICF systems for your next home

ENERGY EFFICIENT

ECO-Block walls are airtight with a minimum insulation value of R 3.78 with interior plaster board. Savings of 50% (or more) on heating and cooling costs are possible.

HEALTHY

ECO-Block walls provide a building envelope that is airtight and resistant to water infiltration. The inorganic nature of the ECO-Block ICF will not support mold growth ensuring a superior indoor air quality free from unwanted allergens, pollutants and mold.

QUIET

Walls constructed with ECO-Block forms dramatically reduce outside noise, providing a more comfortable inside environment.

FIRE RATED

ECO-Block forms are made of non-toxic, flame-retardant expanded polystyrene. Up to a 4 hour fire rating can be achieved (Certified by BRANZ).

INCREASED STRENGTH

Nothing rivals steel-reinforced concrete for strength. Unlike timber, concrete is stable and will not warp, twist, or rot.

COST

The cost to build your ECO-Block home is comparable to that of other forms of construction, but with numerous additional benefits.

RESALE VALUE

All the features integrated into an ECO-Block home will add re-sale value, making your investment more valuable in the long term.

ENVIRONMENTALLY FRIENDLY & SUSTAINABLE CONSTRUCTION

ECO-Block has designed its system to be kind to the environment, reducing the pressure on natural resources. The Life Cycle performance of ICF products is far greater than traditional construction systems

So why wouldn't you?

SIMPLER. FASTER. BETTER.
